

# RightLine™

## PRONAMIDE 3.3 SC

The Right Package Size = 1 Gallon Bottles!

*The Right Product for pre-emergence and early post-emergence control of Poa annua and many other winter annual and perennial grasses on warm-season turfgrass.*

**RightLine® PRONAMIDE™ 3.3 SC:** For use on turf grown for sod and nonresidential sites such as, golf courses, industrial and office building sites, stadium and professional athletic fields, woody ornamentals, nursery stock of ornamentals and Christmas trees.

- ▶ Use standard rates as listed below or try the new split application\* **10/10/10 Greens Program**
- ▶ Apply 10 oz per acre for 3 months in a row!
- ▶ Achieve great weed control.
- ▶ Get better coverage.
- ▶ Less concern about overlapping sprays

\*Split application is permitted by the label. See label details.

Follow the dosage rate and timing instructions given below:

Annual Bluegrass Growth Stage	RightLine Pronamide 3.3 SC pints/Acre <sup>1</sup> Broadcast Application
Pre-emergence or early post-emergence	1.25 - 2.5 <sup>2</sup>
Post-emergence - early tillering to heading	2.0 - 2.5
Post-emergence - seed forming stations	2.5 - 3.5 <sup>3</sup>

<sup>1</sup> One acre equals 43,560 sq. ft.

<sup>2</sup> Use the higher rate when longer pre-emergence residual control is desired.

<sup>3</sup> On golf course greens and tees, do not apply more than 2.5 pts/acre (1 lb. ai/acre) per application and be careful not to overlap spray patterns.
